

# On-Line Tutorials Assignment

## Molecular Biology

The **purpose** of this assignment is to encourage you to look at the huge variety of animations and interactive tutorials that support our study of molecular biology. These sites are easy to handle, fun, and helpful, so why not?!

### Where can I find the sites?

\* You can go to Mr. LeBlanc's teacher's website under the LINKS tap and review the sites associated with Chapter 3. If you are having trouble accessing all the links in my Links folder you can also view Chapter 3 websites by opening: Portaportal.com and there is a Chapter 3 folder with tutorial websites listed. Most of the links are animations and tutorials. You may check the links that are listed at my website, but, to earn the maximum amount of points try to evaluate new sites.

### Instructions:

A. List at least TEN websites you looked up, with their FULL URL addresses.

B. Describe at least 5 links, as follows:

- 1) What is this tutorial or animation aiming to teach?
- 2) Describe the tutorial / animation.
- 3) What are details they are putting emphasis on?
- 4) Are there any details you know and saw before, that they decided to leave out?
- 5) Would you recommend this tutorial to other students in our course? Write a few sentences to persuade others to use or not use this website for our course.

### Procedures:

- Points: 25 pts (+5/evaluation)
- Work must be Printed and Typed!
- Partners are allowed – no more than two people per paper!
